EDUCATION

B.Sc. in Software Engineering, Addis Ababa Science and Technology University

Expected 2028

Addis Ababa, Ethiopia

- Relevant Coursework: Data Structures & Algorithms, Internet Programming, Database Systems, Object-Oriented Programming, Operating Systems.

GDG Frontend Development with HTML, CSS & JS, Google Developers Group

(GDG) — AASTU

Addis Ababa, Ethiopia

GDG Backend Development with NodeJs, Express & MongoDB, Google Developers

Group (GDG) — AASTU

Addis Ababa, Ethiopia

PROFESSIONAL SUMMARY

Software Engineering student and Full-Stack Web Developer experienced in building scalable, responsive, and user-centered web applications. Skilled in frontend development with React and modern UI frameworks, as well as backend integration, authentication systems, and database-driven applications. Passionate about writing clean, maintainable code and developing real-world systems that solve practical problems.

PROJECT EXPERIENCE

Dynamic QR-Based Attendance Management System (Full-Stack)

- Designed and developed a secure attendance tracking system using dynamic QR code generation.
- Implemented user authentication, session management, and role-based access control.
- Built backend APIs for attendance recording and reporting.
- Integrated database storage for real-time attendance data management.
- Collaborated using GitHub for version control and structured project workflow.

E-Commerce Web Application (Full-Stack)

- Developed a complete e-commerce platform with product listings, authentication, and cart functionality.
- Implemented backend APIs for product management and order processing.
- Integrated database for persistent product and user data storage.
- Designed responsive frontend interface optimized for cross-device compatibility.

Online Code Editor Application

- Built a browser-based code editor supporting multiple programming languages.
- Integrated Piston API for real-time code compilation and execution.
- Implemented syntax highlighting and structured error handling.
- Designed modular UI components using modern frontend frameworks.

Movie Discovery Application

- Developed a responsive movie browsing platform using external API integration.
- Implemented dynamic data fetching, loading states, and error handling.
- Built client-side persistent favorites system using local storage.

My Estate – Real Estate Landing Page

- Designed and developed a fully responsive real estate landing page.
- Applied modern UI/UX principles and component-based architecture.

SKILLS

Languages HTML, CSS, JavaScript, Java, C++

Frontend React.js, Vite, TailwindCSS, Chakra UI

Backend & Tools REST APIs, Node.js, Express, MongoDB, Git, GitHub, Postman, VS Code, Vercel, Render, Database Integration
